Pages that take in Data and how to find them easily

This is where we got the template from: **https://thefront.maccarianagency.com/web-basic**

I added links from the website to each individual section so you can see how they look

1) Account Information

- General.js (src/views/Account/components/General/General.js)
  - o Takes strings
  - o Used to update private information
  - o Example: https://thefront.maccarianagency.com/account-general

- Security.js (src/views/Account/Security/Security.js)
  - o Takes strings
  - o Used to change password/re-type password or make page public
  - o Example: https://thefront.maccarianagency.com/account-security

2) SignUp

- Form.js (src/views/SignupSimple/components/Form/Form.js)
  - o Takes strings
  - o Used to get first/last name, email, and password
  - o Example: https://thefront.maccarianagency.com/signup-simple

3) Login

- Form.js (src/views/SigninSimple/components/Form/Form.js)
  - o Takes Strings
  - o Used to enter email and password
  - o Example: https://thefront.maccarianagency.com/signin-simple

4) Password Reset

- Form.js (src/views/PasswordResetSimple/components/Form/Form.js)
  - o Takes Strings
  - o Used to recover password
  - o Example: https://thefront.maccarianagency.com/password-reset-simple
